## August – National Immunization Awareness Month

In recognition of this annual observance The Gila River Tribal Health Department in conjunction with the Arizona Department of Health Services (AZDHS) would like to highlight what you need to know about protecting infants, children, and adults from vaccine preventable diseases. On time vaccination for the whole family is essential because it helps provide immunity before you are exposed to potentially life-threatening illness. It is never too late to catch up if you are behind. Vaccines are tested to ensure that they are safe and effective for children to receive at the recommended ages. Keep copies of the family's immunizations records. If you need copies you can fill out a request form with proper identification at your local health care provider's office.

AZ Infectious Disease Resource

## Healthy KIDS AZ

The AZ Infectious Disease Resource (IDAZ) is a free mobile app where can obtain the latest health news and public health recommendations regarding infectious diseases in the state such as: public health alerts, community clinic locations, locations of public health events, attain CME credits, and receive the most current CDC recommendations. Also Healthy KIDS AZ is another free mobile app geared towards Arizona's school nurses and child care staff who take care of our pediatric population on a daily basis. Healthy Kids AZ includes access to electronic versions of the infectious disease and injury prevention flipcharts, AZ specific vaccine information, infection control guidance, and much more in the palm of your hand. Both apps can be downloaded at the App store or on Google Play.

For more information: Talk to your healthcare provider, Tribal, County or State public health departments or call/visit:
